CORE WALL SCONCE

SPECS

Width	11.81"	30	cm
Lenght	11.81"	30	cm
Height	29.53"	75	cm

Core has been built from small beads. The length of the piece can be adjusted as well as the diameter and the lightness or density of the structure. To create a warm and mystic atmosphere, the light is hidden inside a glass tube that is opaque. This light atmosphere underlines the idea of a mystic piece. Each and every piece will look different from the other, as all are made by hand and each turn in the way your hand makes, will create a corner, edge or turn in the structure that the one before does not show.

Materials:

Brass, Steel, Glass
