GATHERING STORM III

SPECS

These pieces, made with indigo and charcoal, explore the construction of the landscape. Instead of being passive vessels of meaning, the indigo and charcoal present themselves as dynamic actors, charged with their vitality that resonates in the textures and emerging patterns. The result is an abstract topography that evokes geological formations and cosmic landscapes, demonstrating the vibrant forces of the materials that surround and permeate us.

Añil and charcoal on paper.

GATHERING STORM III

by ANDREA BORES

*Cleaning should consist only on light dusting, avoid cleaning with household chemical products.
